

"Be Sure It's Secure" - Securing Your PDF

1. Click on the "Create secure PDF" icon on the toolbar.
2. Sidebar "Create Secure PDF From file" will appear on the left.
3. Click "Browse" to pick a source file you want to create PDF file from.
4. Set the "Document info" data like: Title, Author, Subject, Keywords and then press "Next" button

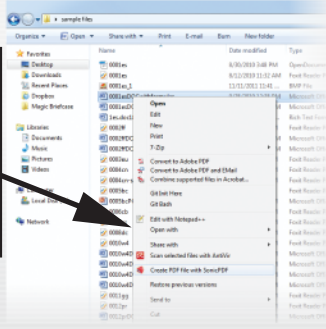

Use Sonic's UI to create your PDFs:

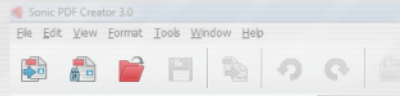

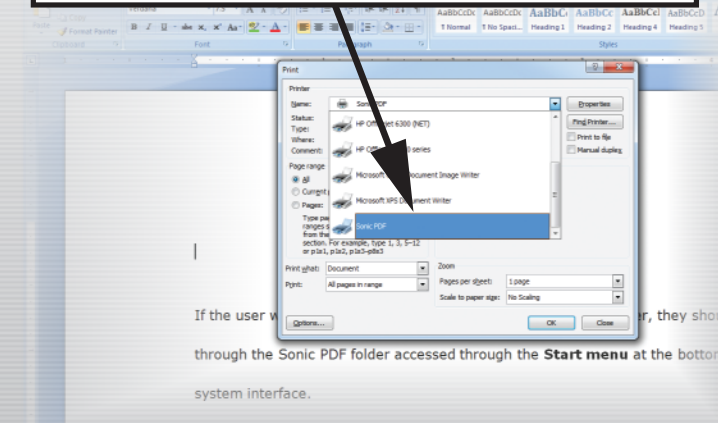

1. Click on the "Create PDF" icon on the toolbar
2. Sidebar "Create PDF From file" will appear on the left
3. Click "Browse" to pick a source file you want to create PDF file from
4. Click on the "Create PDF" button
5. Created PDF file will appear in the viewer window on the right

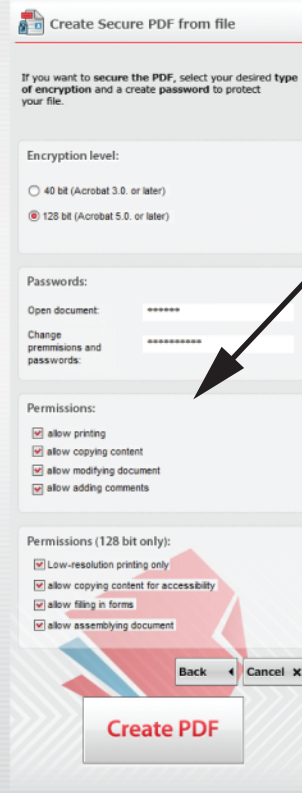

Or you can **right click the file** you want to convert to PDF anywhere in Windows Explorer and click on "Create PDF file with Sonic PDF" option

Or you can use **Print Driver PDF Creation** in any Windows software using a Print dialog and picking **Sonic PDF** as a Printer Name

The **second "Create Secure PDF from file"** sidebar will appear where you can set the **encryption type**, **passwords for opening and editing** the document, and check on or off all the various **permissions** for that secured file you're creating.

Thank you for choosing Sonic PDF Creator!
