Customizing Excel Startup	
Switch	**Description**
/i	Forces Microsoft Excel to start with a maximized window. Previously saved window size settings are ignored.
/o	Forces Excel to re-register itself. Specifically, the following key is rewritten in the registry: Excel 97: HKEY_CURRENT_USER\Software\Microsoft\Office\8.0\Excel Excel 2000: HKEY_CURRENT_USER\Software\Microsoft\Office\9.0\Excel Excel 2002: HKEY_CURRENT_USER\Software\Microsoft\Office\10.0\Excel Excel 2003: HKEY_CURRENT_USER\Software\Microsoft\Office\11.0\Excel NOTE: If this key contains values that are not valid, they are not corrected by using this switch. This switch only replaces missing values. Example: /o
/p <folder>	Forces Excel to use the path that you specify as the active path instead of the default path. Example: /p "C:\Windows"
/regserver	Forces Excel to register itself and then quit. Use this switch when you want Excel to rewrite all of its registry keys and reassociate itself with Excel files, such as workbooks, charts, and so on. Example: /regserver
/unregserver	Forces Excel to unregister itself and then quit. Example: /unregserver
